Greatly Benefited by Chamberlain's Tablets

"I am thankful for the good I have received by using Chamberlain's Tablets. About two years ago when I began taking them I was suffering a great deal from distress after eating, and from headache and a tired, languid feeling due to indigestion and a torpid liver. Chamberlain's Tablets corrected these disorders in a short time, and since taking two bottles of them my health has been good," writes Mrs. M. P. Harwood, Auburn, N. Y.

"Safety First" Tea Kettle.

A new tea kettle is supplied with an extra opening in the top through which it may be filled without the inconvenience and danger of being scalded by the steam generated when cold water is poured into the hot kettle. The second opening is a small one in front of the bail and is protected by a hinged swing cover, which may be operated by the thumb while the kettle is being held by the bail under the faucet.

MEAT PRODUCERS DID FULL DUTY

Increase in American Hogs Will Help to Meet World Fat-Shortage.

FARMERS SAVE SITUATION.

Government Justified in Stimulation of Pork Production—Sevenfold Increase Over Pre-War Exports.

Through increased production of pork, the American farmer has done his full duty in helping to meet the world's fat shortage. The government is justified in its stimulation of pork production, which has resulted in a sevenfold increase over pre-war exports. The heavy demands added in Europe for the millions who have been freed from German oppression, the Department of Agriculture and the Food Administration are justified in their every action of stimulation of hog production. In the coming year, the greatest world shortage will be in fat, and pork will help to save this situation. The efficacy of the policy of stimulated production has been proved in this country supplies which will enable us to supply a very large part of the fat deficiency of the world. In fact there must be a shortage in Europe due largely to limited refrigeration ship capacity. All freezer ships available, however, will be filled by American, Argentine and Australia. The contribution made by the producers of this country to the war program as applying particularly to animal food products is illustrated by the following:

Reports compiled by the U. S. Department of Agriculture indicate an increase in cattle of 10,238,000 head and 12,441,000 hogs. These figures were compiled to January 1 last.

In this period there was a decrease in sheep of 819,000 head. The indications are that this decrease will show an increase, according to recent reports.

Since January 1 unofficial information indicates an increase in hogs of not less than 8 per cent, and not more than 15 per cent, as compared with one year ago, with an increase in the average weight.

Following the request of the U. S. Food Administration for an increase in hog production for marketing in the fall of 1918 and the spring of 1919, the increase may yield not less than 1,400,000 pounds more of pork products than were available last year. Without this increase the shipping program arranged by Mr. Hoover regarding animal food products would have been impossible.

The dressed hog products during the three months ending September 30, 1917, amounted to 93,172,000 pounds, while for the corresponding months of 1918 the dressed hog products totaled 1,277,589,000, an increase of over 244,000,000 pounds for the quarter.

During the same period for 1917 the records of inspected slaughter of dressed beef showed 1,263,000,000 pounds as against 1,454,000,000 pounds for the three month period ending September 1, 1918.

America's Pledge of Food
 Gave Heart to the Allies
 In Their Darkest Hour

Whatever is necessary America will send. That was America's pledge to the interrelated food council. And because the American food army had hitherto made good they took heart and went forward.

Farm enterprise and much soft corn increased pork supplies, food conservation increased exports—total shipments doubled.

FAITH JUSTIFIED
 BY EVENTS
 I do not believe that drastic force need be applied to maintain economic distribution and same use of supplies by the great majority of American people, and I have learned a deep and abiding faith in the intelligence of the average American business man, whose aid we anticipate and depend on to remedy the evils developed by the war.—Herbert Hoover, August 10, 1917.

Briefly Answered.

The English manner of today, of what are called the classes, is the growth of only a century or so, John Galsworthy writes in the Yale Review. There was probably nothing at all like it in the days of Elizabeth or even of Charles II. The English manner was still racy when the inhabitants of Virginia, as we are told, sent over to ask that there might be dispatched to them some hierarchical assistance for the good of their souls, and were answered "D—a your souls grow to becco."

Economic Army Rations.

How the Mongols, like the Italians, put up an army fat for their forces in message casing, but go them two better in also utilizing the strong lamban fiber tissue paper and thin sheets of dried liver as containers. Mr. Lodi describes as follows: "The liver is cut into thin sheets and wrapped around the fat. In drying, like the Italian cheese covering, it contracts, and keeps its contents airtight. The whole thing is edible, liver having some food value, the membrane none."

Shipping With a Magnet.

Carry a magnet when you go shopping. It will tell you before you purchase whether the metal buttons, the hooks and eyes and clasps for sale at notion counter, or those attached to clothing or gloves you may consider buying are going to rust or not when they are laundered. Just touch the magnet to the hook or clasp, and if it clings to them, they will rust.

Scale Reveals Salmon's Age.

A single scale from a salmon will tell its owner's age and whether the fish's pickings have been slim or fat. When viewed through a microscope the scale will reveal tiny lines, which have developed at the rate of 10 a year. Lines crowded close prove that the salmon has been living high. Lines widely spread indicate a scant diet.

Startling Results.

A speaker at a recent meeting of the Rotary club was speaking on the power of advertising. "Why," he remarked, "my partner, Walkerson, advertised for a boy yesterday, and he just wired me that his wife has just presented him with two—they are twins."

Bill Puzzled.

Bill, age three, was ready for bed but before being tucked in for the night, knelt at his bedside to say his prayer. He repeated it without a mistake until he was ready to say "Amen"—then he forgot, and calling to his mother, said, "Now, how do you say 'good-night'?"

All Mixed.

Mrs. Mix—"There was a time when our children were I said, but now it's just winter on a duck's back, with one ear out and the other in."—London Answers.
